Perfect Lattices in Euclidean Space

Jacques Martinet

Perfect Lattices in Euclidean Space Jacques Martinet

Lattices are discrete subgroups of maximal rank in a Euclidean space. To each such geometrical object, we can attach a canonical sphere packing which, assuming some regularity, has a density. The question of estimating the highest possible density of a sphere packing in a given dimension is a fascinating and difficult problem: the answer is known only up to dimension 3.

This book thus discusses a beautiful and central problem in mathematics, which involves geometry, number theory, coding theory and group theory, centering on the study of extreme lattices, i.e. those on which the density attains a local maximum, and on the so-called perfection property.

Written by a leader in the field, it is closely related to, though disjoint in content from, the classic book by J.H. Conway and N.J.A. Sloane, *Sphere Packings, Lattices and Groups*, published in the same series as vol. 290.

Every chapter except the first and the last contains numerous exercises. For simplicity those chapters involving heavy computational methods contain only few exercises. It includes appendices on Semi-Simple Algebras and Quaternions and Strongly Perfect Lattices.

From reader reviews:

David Hester:

What do you about book? It is not important to you? Or just adding material when you want something to explain what your own problem? How about your spare time? Or are you busy person? If you don't have spare time to accomplish others business, it is give you a sense of feeling bored faster. And you have time? What did you do? Every person has many questions above. They must answer that question due to the fact just their can do that will. It said that about publication. Book is familiar on every person. Yes, it is appropriate. Because start from on guardería until university need this specific Perfect Lattices in Euclidean Space to read.

Ezra Talbott:

Do you among people who can't read pleasurable if the sentence chained inside the straightway, hold on guys that aren't like that. This Perfect Lattices in Euclidean Space book is readable by you who hate those straight word style. You will find the information here are arrange for enjoyable reading experience without leaving perhaps decrease the knowledge that want to offer to you. The writer involving Perfect Lattices in Euclidean Space content conveys prospect easily to understand by a lot of people. The printed and e-book are not different in the content material but it just different by means of it. So , do you still thinking Perfect Lattices in Euclidean Space is not loveable to be your top listing reading book?

Arthur Seaton:

This Perfect Lattices in Euclidean Space are reliable for you who want to certainly be a successful person, why. The reason of this Perfect Lattices in Euclidean Space can be on the list of great books you must have will be giving you more than just simple studying food but feed you with information that perhaps will shock your before knowledge. This book will be handy, you can bring it everywhere and whenever your conditions both in e-book and printed people. Beside that this Perfect Lattices in Euclidean Space forcing you to have an enormous of experience for instance rich vocabulary, giving you tryout of critical thinking that we know it useful in your day exercise. So , let's have it and luxuriate in reading.

John Barrow:

Many people spending their time by playing outside together with friends, fun activity using family or just watching TV all day long. You can have new activity to spend your whole day by reading a book. Ugh, you think reading a book will surely hard because you have to accept the book everywhere? It okay you can have the e-book, getting everywhere you want in your Mobile phone. Like Perfect Lattices in Euclidean Space which is keeping the e-book version. So , try out this book? Let's see.
