Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century Delia Neuman

The amount and range of information available to today's students—and indeed to all learners—is unprecedented. Phrases like “the information revolution”, “the information (or knowledge) society”, and “the knowledge economy” underscore the truism that our society has been transformed by virtually instantaneous access to virtually unlimited information. Thomas Friedman tells us that “The World Is Flat” and that we must devise new political and economic understandings based on the ceaseless communication of information from all corners of the world. The Bush administration tells us that information relating to the “war on terrorism” is so critical that we must allow new kinds of surveillance to keep society safe. Teenage subscribers to social-computing networks not only access information but enter text and video images and publish them widely—becoming the first adolescents in history to be creators as well as consumers of vast quantities of information.

If the characteristics of “the information age” demand new conceptions of commerce, national security, and publishing—among other things—it is logical to assume that they carry implications for education as well. In fact, a good deal has been written over the last several decades about how education as a whole must transform its structure and curriculum to accommodate the possibilities offered by new technologies. Far less has been written, however, about how the specific affordances of these technologies—and the kinds of information they allow students to access and create—relate to the central purpose of education: learning. What does “learning” mean in an information-rich environment? What are its characteristics? What kinds of tasks should it involve? What concepts, strategies, attitudes, and skills do educators and students need to master if they are to learn effectively and efficiently in such an environment? How can researchers, theorists, and practitioners foster the well-founded and widespread development of such key elements of the learning process?

This book explores these questions and suggests some tentative answers. Drawing from research and theory in three distinct but related fields—learning theory, instructional systems design, and information studies—it presents a way to think about learning that responds directly to the actualities of a world brimming with information. The book is grounded in the work of such key figures in learning theory as Bransford and Anderson & Krathwohl. It draws on such theorists of instructional design as Gagne, Mayer, and Merrill. From information studies, it uses ideas from Buckland, Marchionini, and Wilson (who is known for his pioneering work in “information behavior”—that is, the full range of information seeking and use). The book breaks new ground in bringing together ideas that have run in parallel for years but whose relationship has not been fully explored.

From reader reviews:

Anna Raynor:

Book is to be different per grade. Book for children till adult are different content. We all know that that book is very important for all of us. The book Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century has been making you to know about other know-how and of course you can take more information. It is quite advantages for you. The book Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century is not only giving you much more new information but also being your friend when you truly feel bored. You can spend your own personal spend time to read your guide. Try to make relationship while using book Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century. You never sense lose out for everything in case you read some books.

Jennifer Chambers:

This Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is usually information inside this book incredible fresh, you will get info which is getting deeper anyone read a lot of information you will get. That Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century without we realize teach the one who studying it become critical in thinking and analyzing. Don't always be worry Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century can bring if you are and not make your case space or bookshelves' grow to be full because you can have it with your lovely laptop even phone. This Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century having great arrangement in word as well as layout, so you will not really feel uninterested in reading.

Gale Velez:

Information is provisions for those to get better life, information nowadays can get by anyone from everywhere. The information can be a expertise or any news even a concern. What people must be consider if those information which is in the former life are challenging to be find than now's taking seriously which one would work to believe or which one the particular resource are convinced. If you get the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All of those possibilities will not happen in you if you take Learning in Information-Rich Environments: I-LEARN and the Construction of Knowledge in the 21st Century as the daily resource information.

Willie Batres:

Is it you actually who having spare time after that spend it whole day through watching television programs or just lying on the bed? Do you need something new? This Learning in Information-Rich Environments: I-

LEARN and the Construction of Knowledge in the 21st Century can be the answer, oh how comes? A book you know. You are consequently out of date, spending your time by reading in this fresh era is common not a nerd activity. So what these ebooks have than the others?
