Cardiovascular Endocrinology:: Shared Pathways and Clinical Crossroads (Contemporary Endocrinology)

Cardiovascular Endocrinology:: Shared Pathways and Clinical Crossroads (Contemporary Endocrinology)

Over the past few decades, cardiovascular disease and diabetes have emerged as major public health problems, both as distinct clinical entities and as comorbid conditions. As a result, the fields of vascular biology and endocrinology are working more closely now than ever before. With chapters by renowned experts, *Cardiovascular Endocrinology: Shared Pathways and Clinical Crossroads* emphasizes the considerable physiological interrelationships and clinical correlations between the specialties of cardiovascular medicine and endocrinology.

Offering a wealth of information, *Cardiovascular Endocrinology: Shared Pathways and Clinical Crossroads* provides a range of insights, including a novel view of the hormonal regulation of the vascular system and the disruption of the nitric oxide signaling system. It also addresses the role of fatty acids and cytokines in the development of this problem. Importantly, this unique title also provides a state-of-the-art update on the importance of other hormones such as thyroid hormone and steroids, as well as the pathophysiology of cardiovascular disease and controversies surrounding the use of hormone replacement therapy.

In all, *Cardiovascular Endocrinology: Shared Pathways and Clinical Crossroads* is a first-of-its-kind title that discusses and summarizes important clinical topics in cardiology and endocrinology. It offers clinicians and researchers an important resource for navigating the increasingly interrelated pathways of cardiovascular and endocrinologic disorders. The authors discuss a range of important issues from epidemiology to bench research to translation of this research to clinical practice.
