**Robot Motion: Planning and Control (Artificial Intelligence)** John M. Hollerbach, Tomas Lozano-Perez

The present surge of interest in robotics can be expected to continue through the 1980s. Major research efforts are springing up throughout industry and in the universities. Senior and graduate level courses are being developed or planned in many places to prepare students to contribute to the development of the field and its industrial applications. Robot Motion will serve this emerging audience as a single source of information on current research in the field. The book brings together nineteen papers of fundamental importance to the development of a science of robotics. These are grouped in five sections: Dynamics; Trajectory Planning; Compliance and Force Control; Feedback Control; and Spatial Planning. Each section is introduced by a substantial analytical survey that lays out the problems that arise in that area of robotics and the approaches and solutions that have been tried, with an evaluation of their strengths and shortcomings. In addition, there is an overall introduction that relates robotics research to general trends in the development of artificial intelligence. Individual papers are the work of H. Hanafusa, H. Asada, N. Hogan, M. T. Mason, R. Paul, B. Shimano, M. H. Raibert, J. J. Craig, R. H. Taylor, D. E. Whitney, J. M. Hollerbach, J. Luh, M. Walker, R. J. Popplestone, A. P. Ambler, I. M. Bellos, T. LozanoPerez, E. Freund, D. F. Golla, S. C. Garg, P. C. Hughes, and K. D. Young. The editors are all research scientists at MIT's Artificial Intelligence Laboratory and in addition, Michael Brady is coeditor with Richard Paul of The International Journal of Robotics Research. Robot Motion is included in the MIT Press Artificial Intelligence Series.

### **From reader reviews:**

#### **James Davis:**

The actual book Robot Motion: Planning and Control (Artificial Intelligence) will bring you to definitely the new experience of reading a book. The author style to explain the idea is very unique. In the event you try to find new book to see, this book very ideal to you. The book Robot Motion: Planning and Control (Artificial Intelligence) is much recommended to you to study. You can also get the e-book through the official web site, so you can more easily to read the book.

#### **Bertha Chang:**

Your reading sixth sense will not betray you, why because this Robot Motion: Planning and Control (Artificial Intelligence) book written by well-known writer whose to say well how to make book that may be understand by anyone who else read the book. Written in good manner for you, dripping every ideas and composing skill only for eliminate your own personal hunger then you still question Robot Motion: Planning and Control (Artificial Intelligence) as good book not merely by the cover but also by content. This is one e-book that can break don't evaluate book by its handle, so do you still needing another sixth sense to pick this!?! Oh come on your reading sixth sense already alerted you so why you have to listening to one more sixth sense.

#### **Estelle Hicks:**

This Robot Motion: Planning and Control (Artificial Intelligence) is completely new way for you who has interest to look for some information because it relief your hunger associated with. Getting deeper you in it getting knowledge more you know or else you who still having bit of digest in reading this Robot Motion: Planning and Control (Artificial Intelligence) can be the light food to suit your needs because the information inside this particular book is easy to get by simply anyone. These books acquire itself in the form which is reachable by anyone, yes I mean in the e-book contact form. People who think that in reserve form make them feel drowsy even dizzy this publication is the answer. So you cannot find any in reading a guide especially this one. You can find actually looking for. It should be here for an individual. So , don't miss this! Just read this e-book style for your better life and knowledge.

#### **Myrtle Galloway:**

Reading a e-book make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is created or printed or outlined from each source which filled update of news. On this modern era like at this point, many ways to get information are available for a person. From media social just like newspaper, magazines, science e-book, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just trying to find the Robot Motion: Planning and Control (Artificial Intelligence) when you needed it?
