Aggression against Ukraine: Territory, Responsibility, and International Law (American Foreign Policy in the 21st Century) Thomas D. Grant

Aggression against Ukraine marks a stunning shift. Ever since 1945 it had been understood that the borders of States must not be the object of forcible change by other States. However, Russia has now revived long-buried historical claims—and prosecutes them by dint of arms. The annexation of Crimea in March 2014 and the subsequent armed incursions in eastern Ukraine under color of separatist movements in Donetsk and Luhansk challenge not just one State's territorial integrity, but jeopardize the general settlement on which international law for almost three generations has rested. This is the settlement which enabled human rights and modern institutions of international law to flourish. Russia's domestic rejection of human rights and its new geopolitics of territorial seizure in this light should be seen not in isolation but as connected developments—and as a challenge to international law and global public order at large.
