Life and Death of the Stars (Undergraduate Lecture Notes in Physics)

Ganesan Srinivasan

Life and Death of the Stars (Undergraduate Lecture Notes in Physics) Ganesan Srinivasan

This volume is devoted to one of the fascinating things about stars: how they evolve as they age. This evolution is different for stars of different masses. How stars end their lives when their supply of energy is exhausted also depends on their masses. Interestingly, astronomers conjectured about the ultimate fate of the stars even before the details of their evolution became clear. Part I of this book gives an account of the remarkable predictions made during the 1920s and 1930s concerning the ultimate fate of stars. Since much of this development hinged on quantum physics that emerged during this time, a detailed introduction to the relevant physics is included in the book. Part II is a summary of the life history of stars. This discussion is divided into three parts: low-mass stars, like our Sun, intermediate-mass stars, and massive stars. Many of the concepts of contemporary astrophysics were built on the foundation erected by Subrahmanyan Chandrasekhar in the 1930s. This book, written during his birth centenary, includes a brief biographical sketch of the brilliant scientist, which readers will find fascinating.

Reading this book will get young students excited about the presently unfolding revolution in astronomy and the challenges that await them in the world of physics, engineering and technology. General readers will also find the book appealing for its highly accessible narrative of the physics of stars.

This book is a companion volume of "What are the Stars?" by the same author.

"I know of no other book on the evolution of stars of a similar scope and breadth that is so accessible for undergraduate students."

E P J van den Heuvel
Professor of Astrophysics

Winner of the Spinoza and Descartes Prizes University of Amsterdam, The Netherlands

From reader reviews:

Rose Sosa:

In this 21st centuries, people become competitive in every way. By being competitive right now, people have do something to make all of them survives, being in the middle of the actual crowded place and notice by means of surrounding. One thing that often many people have underestimated that for a while is reading. Yes, by reading a book your ability to survive enhance then having chance to stand up than other is high. To suit your needs who want to start reading a new book, we give you this Life and Death of the Stars (Undergraduate Lecture Notes in Physics) book as starter and daily reading e-book. Why, because this book is greater than just a book.

Cynthia Miller:

The particular book Life and Death of the Stars (Undergraduate Lecture Notes in Physics) will bring you to the new experience of reading the book. The author style to clarify the idea is very unique. When you try to find new book to study, this book very ideal to you. The book Life and Death of the Stars (Undergraduate Lecture Notes in Physics) is much recommended to you to learn. You can also get the e-book from the official web site, so you can more easily to read the book.

Mikel Davis:

The book untitled Life and Death of the Stars (Undergraduate Lecture Notes in Physics) contain a lot of information on it. The writer explains the girl idea with easy way. The language is very clear and understandable all the people, so do definitely not worry, you can easy to read that. The book was published by famous author. The author provides you in the new period of time of literary works. It is easy to read this book because you can keep reading your smart phone, or device, so you can read the book in anywhere and anytime. If you want to buy the e-book, you can start their official web-site along with order it. Have a nice go through.

Stacey Sims:

In this era which is the greater man or woman or who has ability to do something more are more valuable than other. Do you want to become certainly one of it? It is just simple method to have that. What you should do is just spending your time almost no but quite enough to experience a look at some books. On the list of books in the top list in your reading list is actually Life and Death of the Stars (Undergraduate Lecture Notes in Physics). This book and that is qualified as The Hungry Mountains can get you closer in turning out to be precious person. By looking upwards and review this e-book you can get many advantages.
