Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites Allen W. Hatheway

Winner of the 2013 Claire P. Holdredge Awardee for *Remediation of Former Manufactured Gas Plants and Other Coal-Tar Sites*.

This award, first established in 1962 by the Association of Environmental and Engineering Geologists, is named in honor of Claire P. Holdredge, a founding member and the first President of the Association. The award is presented for a publication by an AEG Member(s) within the 5 previous years that is adjudged to be an outstanding contribution to the Engineering Geology profession.

Remediation of Former Manufactured Gas Plants and Other Coal-Tar Sites is geared toward environmental professionals who want to design and implement gasworks remediation strategies that offer the greatest chance to successfully protect the public. Exploring the bases for selecting remedial alternatives to adequately address today's environmental wounds, this compendium of essential knowledge combines historic and modern scientific data and technology with common sense and empirical lore passed down from past generations of gas professionals, a group that is now all but extinct.

Most of the general population does not have a sufficient understanding of remediation needs. Unfortunately, there seems to be a similar lack of knowledge among some environmental professionals whose job it is to protect the public from the health threats associated with coal tar. Pitfalls in remediation are common and represent a significant risk to the public, especially when processes are based on inaccurate assumptions.

This book sifts through the existing scholarship from around the developed world to present the necessary evaluation factors used in effective remediation. Almost encyclopedic in scope, it offers 265 separate tables with checklists, hard data facts, and associations to help readers define site-specific gas plant conditions. It also includes a plethora of photographs and historic drawings, as well as an extensive glossary that is indispensable for understanding potential and actual gas plant contamination.

Useful for engineers, scientists, regulators, public officials, historians, and journalists among others, this book is intended for those who conduct remediation, as well as those involved in review and oversight. Its goal is to bring users closer to safely reclaiming land and reviving old coal gasworks sites in ways that ultimately will be sustainable for the public interest.

From reader reviews:

Brad Black:

Book is to be different for every grade. Book for children until adult are different content. As you may know that book is very important for people. The book Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites has been making you to know about other expertise and of course you can take more information. It is extremely advantages for you. The e-book Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites is not only giving you more new information but also for being your friend when you feel bored. You can spend your spend time to read your guide. Try to make relationship with the book Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites. You never feel lose out for everything when you read some books.

Pamela Dudley:

Here thing why this kind of Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites are different and trustworthy to be yours. First of all examining a book is good nonetheless it depends in the content of computer which is the content is as yummy as food or not. Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites giving you information deeper including different ways, you can find any e-book out there but there is no reserve that similar with Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites. It gives you thrill studying journey, its open up your own personal eyes about the thing which happened in the world which is probably can be happened around you. You can easily bring everywhere like in park, café, or even in your technique home by train. Should you be having difficulties in bringing the paper book maybe the form of Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites in e-book can be your alternative.

Bruce Jackson:

Reading a book can be one of a lot of exercise that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people love it. First reading a publication will give you a lot of new details. When you read a publication you will get new information because book is one of numerous ways to share the information or even their idea. Second, looking at a book will make an individual more imaginative. When you studying a book especially hype book the author will bring someone to imagine the story how the personas do it anything. Third, you could share your knowledge to other people. When you read this Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites, you can tells your family, friends and also soon about yours book. Your knowledge can inspire others, make them reading a guide.

Jesus Curry:

In this period globalization it is important to someone to find information. The information will make a professional understand the condition of the world. The health of the world makes the information much

easier to share. You can find a lot of referrals to get information example: internet, newspapers, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. Often the book that recommended to your account is Remediation of former Manufactured Gas Plants and Other Coal-Tar Sites this e-book consist a lot of the information in the condition of this world now. This book was represented just how can the world has grown up. The dialect styles that writer make usage of to explain it is easy to understand. The actual writer made some investigation when he makes this book. Here is why this book acceptable all of you.
