Recent scientific and technological advances have accelerated our understanding of the causes of disease development and progression, and resulted in innovative treatments and therapies. Ongoing work to elucidate the effects of individual genetic variation on patient outcomes suggests the rapid pace of discovery in the biomedical sciences will only accelerate. However, these advances belie an important and increasing shortfall between the expansion in therapy and treatment options and knowledge about how these interventions might be applied appropriately to individual patients. The impressive gains made in Americans' health over the past decades provide only a preview of what might be possible when data on treatment effects and patient outcomes are systematically captured and used to evaluate their effectiveness. Needed for progress are advances as dramatic as those experienced in biomedicine in our approach to assessing clinical effectiveness.

In the emerging era of tailored treatments and rapidly evolving practice, ensuring the translation of scientific discovery into improved health outcomes requires a new approach to clinical evaluation. A paradigm that supports a continual learning process about what works best for individual patients will not only take advantage of the rigor of trials, but also incorporate other methods that might bring insights relevant to clinical care and endeavor to match the right method to the question at hand.

The Institute of Medicine Roundtable on Value & Science-Driven Health Care's vision for a learning healthcare system, in which evidence is applied and generated as a natural course of care, is premised on the development of a research capacity that is structured to provide timely and accurate evidence relevant to the clinical decisions faced by patients and providers. As part of the Roundtable's Learning Healthcare System series of workshops, clinical researchers, academics, and policy makers gathered for the workshop *Redesigning the Clinical Effectiveness Research Paradigm: Innovation and Practice-Based Approaches*. Participants explored cutting-edge research designs and methods and discussed strategies for development of a research paradigm to better accommodate the diverse array of emerging data resources, study designs, tools, and techniques. Presentations and discussions are summarized in this volume.

From reader reviews:

Michael Cardona:

The book Redesigning the Clinical Effectiveness Research Paradigm:: Innovation and Practice-Based Approaches: Workshop Summary (Learning Healthcare Systems) can give more knowledge and also the precise product information about everything you want. Why then must we leave a very important thing like a book Redesigning the Clinical Effectiveness Research Paradigm:: Innovation and Practice-Based Approaches: Workshop Summary (Learning Healthcare Systems)? A few of you have a different opinion about publication. But one aim this book can give many facts for us. It is absolutely appropriate. Right now, try to closer with your book. Knowledge or info that you take for that, you may give for each other; you may share all of these. Book Redesigning the Clinical Effectiveness Research Paradigm:: Innovation and Practice-Based Approaches: Workshop Summary (Learning Healthcare Systems) has simple shape but the truth is know: it has great and massive function for you. You can appearance the enormous world by available and read a publication. So it is very wonderful.

Tom Moore:

Reading a publication tends to be new life style on this era globalization. With reading you can get a lot of information that will give you benefit in your life. The authors these days always try to improve their proficiency in writing, they also doing some exploration before they write on their book. One of them is this Redesigning the Clinical Effectiveness Research Paradigm:: Innovation and Practice-Based Approaches: Workshop Summary (Learning Healthcare Systems).

Brenda Carey:

Playing with family in the park, coming to see the marine world or hanging out with buddies is thing that usually you may have done when you have spare time, subsequently why you don't try matter that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Redesigning the Clinical Effectiveness Research Paradigm:: Innovation and Practice-Based Approaches: Workshop Summary (Learning Healthcare Systems), you are able to enjoy both. It is good combination right, you still wish to miss it? What kind of hang type is it? Oh seriously its mind hangout people. What? Still don't buy it, oh come on its called reading friends.

Amanda Kline:

In this age globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world.
