Introduction to Java Programming Brief Version, 8th Edition

Y. Daniel Liang

Introduction to Java Programming Brief Version, 8th Edition Y. Daniel Liang
This book is a brief version of Introduction to Java Programming, Comprehensive Version, 8E. This version is designed for an introductory programming course, commonly known as CS1. This version contains the first twenty chapters in the comprehensive version. This book uses the fundamentals-first approach and teaches programming concepts and techniques in a problem-driven way. The fundamentals-first approach introduces basic programming concepts and techniques before objects and classes. My own experience, confirmed by the experiences of many colleagues, demonstrates that new programmers in order to succeed must learn basic logic and fundamental programming techniques such as loops and stepwise refinement. The fundamental concepts and techniques of loops, methods, and arrays are the foundation for programming. Building the foundation prepares students to learn object-oriented programming, GUI, database, and Web programming. Problem-driven means focused on problem-solving rather than syntax. We make introductory programming interesting by using interesting problems. The central thread of this book is on solving problems. Appropriate syntax and library are introduced to support the writing of a program for solving the problems. To support teaching programming in a problem driven way, the book provides a wide variety of problems at various levels of difficulty to motivate students. In order to appeal to students in all majors, the problems cover many application areas in math, science, business, financials, gaming, animation, and multimedia.

From reader reviews:

Larry Young:

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to be aware of everything in the world. Each publication has different aim or goal; it means that reserve has different type. Some people feel enjoy to spend their time and energy to read a book. They can be reading whatever they acquire because their hobby is usually reading a book. How about the person who don't like examining a book? Sometime, particular person feel need book whenever they found difficult problem or perhaps exercise. Well, probably you should have this Introduction to Java Programming Brief Version, 8th Edition.

Alberta Keyes:

People live in this new day time of lifestyle always try to and must have the extra time or they will get large amount of stress from both everyday life and work. So , when we ask do people have time, we will say absolutely of course. People is human not really a robot. Then we question again, what kind of activity are there when the spare time coming to an individual of course your answer will probably unlimited right. Then do you try this one, reading guides. It can be your alternative with spending your spare time, the book you have read will be Introduction to Java Programming Brief Version, 8th Edition.

William Marsh:

Do you have something that you prefer such as book? The guide lovers usually prefer to opt for book like comic, small story and the biggest one is novel. Now, why not hoping Introduction to Java Programming Brief Version, 8th Edition that give your entertainment preference will be satisfied simply by reading this book. Reading practice all over the world can be said as the opportunity for people to know world better then how they react in the direction of the world. It can't be stated constantly that reading practice only for the geeky person but for all of you who wants to always be success person. So , for all you who want to start examining as your good habit, you are able to pick Introduction to Java Programming Brief Version, 8th Edition become your current starter.

Edward Franco:

As a scholar exactly feel bored to reading. If their teacher expected them to go to the library in order to make summary for some book, they are complained. Just very little students that has reading's spirit or real their leisure activity. They just do what the educator want, like asked to the library. They go to right now there but nothing reading critically. Any students feel that studying is not important, boring and can't see colorful photos on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Introduction to Java Programming Brief Version, 8th Edition can make you feel more interested to read.
