The Melanocytic Proliferation: A Comprehensive Textbook of Pigmented Lesions A. Neil Crowson, Cynthia M. Magro, Martin C. Mihm Jr

The rising number of incidences of melanoma has led to increased interest in the disease from diagnostic, management, and basic science perspectives. The Melanocytic Proliferation describes the pathobiology of pigmented melanocytic lesions, and provides guidelines for their diagnosis and management as they affect the skin and mucosas. Extensively illustrated, this book is divided into four parts: the biology of melanocytes and malignant melanoma; nonmelanocytic lesions (e.g., lentigo, congenital nevi, compound nevi); melanocytic lesions with the potential to develop as melanoma (e.g., dysplastic nevi); and malignant melanoma (e.g., radial and vertical growth phases). Offering extensive discussions of each lesion, The Melanocytic Proliferation covers clinical applications, histology, differential diagnostic features, diagnostic algorithms, immunohistochemistry, electromicroscopy, and, where applicable, treatment, prognosis, and adjuvant therapy. The Melanocytic Proliferation is an excellent and indispensable resource for dermatologists, pathologists, dermapathologists, and surgical pathologists.
